Lentivirus Titer Colloidal Gold Immunochromatographic Calorie

Cat. No. KITF-045 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	The Lentivirus Titer Colloidal Gold Immunochromatographic Calorie is a semi quantitative detection card for HIV-1 P24 protein based on colloidal gold immunochromatography technology. It can determine the virus titer by quickly detecting the P24 protein on the lentivirus and pseudovirus shells. It is suitable for detecting the titer of lentivirus in serum, culture supernatant, samples, etc., helping users achieve efficient lentivirus titer quality control detection. Pseudoviruses based on HIV-1 also contain P24 protein. After transfection, this testing card can also be used to quickly evaluate the packaging effect.
Size	10 Reactions/kit
Storage	Store at room temperature
Kit Components	Lentivirus Quick Detection Card; 1×10 strip; Room temperature Buffer Solution; 1.5mL×1 tube; Room temperature
