Host Cell Residual DNA Sample Preprocessing Kit (Magnetic Bead Method)

Cat. No. KITF-070 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	This kit is used for the pretreatment of biological product samples and accurate extraction of host cell residual DNA in various biological products. This kit is applicable to a variety of matrix buffer solutions for effective extraction and purification of trace amounts of DNA. It can be used in combination with DNA (qPCR) detection kit for biological host cells (CHO, E.coli, Vero, Human, plasmid, SV40LTA & EIA, etc.).
Size	100 Tests
Storage	Twelve (12) months at specified storage conditions.
