

Biotin-NHS

Cat. No. NHS-372 Lot. No. (See product label)

SPECIFICATION

Product Overview	Biotin NHS is an amino reactive biotin reagent for the preparation of biotinylated surfaces or peptides. Biotin NHS is an amine reactive biotinylation reagent that binds effectively to a primary amino group (-NH ₂) to form a stable, irreversible amide bond. When used, it is generally dissolved with dimethyl sulfoxide (DMSO) or dimethylformamide (DMF), which can be further diluted in a water-based buffer without amine.
