Recombinant Salmonella H Antigen Protein

Cat. No. H Antigen-27S **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Salmonella are a group of bacteria that can cause gastrointestinal illness and fever called salmonellosis. Salmonella can be spread by food handlers who do not wash their hands and/or the surfaces and tools they use between food preparation steps, and when people eat raw or undercooked foods. Salmonella can also spread from animals to people. People who have direct contact with certain animals, including poultry and reptiles, can spread the bacteria from the animals to food if they do not practice proper hand washing hygiene before handling food. Pets can also spread the bacteria within the home environment if they eat food contaminated with Salmonella.
Form	Affinity purified, liquid
Purity	>95% pure by SDS-PAGE
Storage Buffer	Tris-buffered saline, pH 8.0
Preservative	0.1% ProClin 300
Applications	Suitable for use in ELISA, Lateral Flow, WB, and other immune tests.
Storage	Upon receipt, quick spin before open vial, aliquot and store at ≤ -20 centigrade. Avoid multiple freeze/thaw cycles
Type	H
