

## Recombinant Human NOB1 protein, His-tagged

**Cat. No.** NOB1-201H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                    |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human NOB1 protein(Q9ULX3)(Asp181-Val300), fused with C-terminal His tag, was expressed in E. coli.                                                                    |
| <b>Species</b>          | Human                                                                                                                                                                              |
| <b>Source</b>           | E.coli                                                                                                                                                                             |
| <b>ProteinLength</b>    | Asp181-Val300                                                                                                                                                                      |
| <b>Tag</b>              | C-His                                                                                                                                                                              |
| <b>Form</b>             | Phosphate buffered saline                                                                                                                                                          |
| <b>Molecular Mass</b>   | 16 KDa                                                                                                                                                                             |
| <b>Storage</b>          | Store at -20°C to -80°C.                                                                                                                                                           |
| <b>Reconstitution</b>   | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.      |
| <b>GenelD</b>           | 28987                                                                                                                                                                              |
