

# Recombinant Rotavirus A Intermediate capsid protein VP6, His-tagged

**Cat. No.** VP6-4633R    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                    |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Rotavirus A Intermediate capsid protein VP6(A7J3A1)(1-397aa), fused with C-terminal His tag, was expressed in Insect cells.                                                                                            |
| <b>Species</b>          | Rotavirus A                                                                                                                                                                                                                        |
| <b>Source</b>           | Insect cells                                                                                                                                                                                                                       |
| <b>ProteinLength</b>    | 1-397aa                                                                                                                                                                                                                            |
| <b>Tag</b>              | C-His                                                                                                                                                                                                                              |
| <b>Form</b>             | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0. |
| <b>Molecular Mass</b>   | 50.5 kDa                                                                                                                                                                                                                           |
| <b>Purity</b>           | Greater than 85% as determined by SDS-PAGE.                                                                                                                                                                                        |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                                     |
| <b>Reconstitution</b>   | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a                                                               |
