

## Recombinant allergen Can f 1 for Canis familiaris (Dog)(Escherichia coli)

Cat. No. IVP-002    Lot. No. (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                                             |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | lipocalin present in domestic dog saliva (Canis familiaris), has been prepared as the recombinant mature protein fused to a his-tag.                                                                                                                                                                                                                                                                        |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Molecular Mass</b>   | Determined by SDS-PAGE, the protein band is between molecular markers of 35, 000 and 25, 000 Da, while relative molecular mass calculated from amino acid sequence is 24, 904.9 Da.                                                                                                                                                                                                                         |
| <b>Purity</b>           | >95% in a SDS-PAGE                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Incidence</b>        | The tested incidence of the protein is 84%, in front of 90% according to the bibliography.                                                                                                                                                                                                                                                                                                                  |
| <b>IVD</b>              | Serodiagnosis of allergy to Dog                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Stability</b>        | The protein will remain stable for four years if stored frozen.                                                                                                                                                                                                                                                                                                                                             |
| <b>Observation</b>      | Proteins should be maintained frozen at high concentrations. In order to defrost the protein, maintain the aliquot at 25°C without shaking to avoid aggregation. Prior making test dilutions and after defrosting the protein, is recommended to remove possible protein aggregates by centrifuging the stock solution, avoiding alterations in the immobilization of the biomolecule to the solid surface. |

|                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Storage</b>       | Protein is shipped with dry ice. Upon arrival, it should be aliquoted in order to avoid repeated freezing and thawing cycles and stored at -20°C to -80°C.                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Concentration</b> | 1.43mg/ml                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Notes</b>         | <p>During shipment, small olumes of product will occasionally become entrapped in the seal of the product vial. For products with volumes of 200 ul or less, we recommend gently tapping the vial on a hard surface or briefly centrifuging the vial in a tabletop centrifuge to dislodge any liquid in the containers cap.</p> <p>Although recombinant antigens are expressed in non-pathogenic P.pastori and bacterial integrity is destroyed during purificaton, the antigen preparation should be handled as potentially infectious.</p> |
| <b>Type</b>          | Recombinant                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>ClassID 1</b>     | Lipocalin                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
