

# Recombinant Human BLNK Protein, His-tagged

**Cat. No.** BLNK-001H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                   |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human BLNK Protein, His-tagged, expressed in E.coli.                                                                                                                                                                                                  |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                             |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                            |
| <b>ProteinLength</b>    | 226-456 aa                                                                                                                                                                                                                                                        |
| <b>Tag</b>              | C-His                                                                                                                                                                                                                                                             |
| <b>Molecular Mass</b>   | 27 kDa                                                                                                                                                                                                                                                            |
| <b>AA Sequence</b>      | MGRNSGAWETKSPPPAAPSPPLPRAGKKPTTPLKTTPVASQQNASSVCEEKPIPAER<br>HRGSSHRQEAVQSPVFPPAQKQIHQKPIPLPRFTEGGNPTVDGPLPSFSSNSTISEQ<br>EAGVLCKPWYAGACDRKSAEEALHRSNKDGSFLIRKSSGHDSKQPYTLVVFNNKRV<br>YNIPVRFIEATKQYALGRKKNGEEYFGSVAEIIRNHQHSPLVLIDSQNNTKDSTRLKY<br>AVKVSHHHHHHHH |
| <b>Purity</b>           | >90% by SDS-PAGE                                                                                                                                                                                                                                                  |
| <b>Storage</b>          | Store it under sterile conditions at -20 to -80 °C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.                                                                                                       |
| <b>Concentration</b>    | 1mg/ml by BCA                                                                                                                                                                                                                                                     |

**Storage Buffer** Sterile PBS, pH 7.4

**GenelD** 29760

## GENE INFORMATION

**Gene Name** BLNK B cell linker [ Homo sapiens (human) ]

**Official Symbol** BLNK

**Synonyms** bca,AGM4,BASH, LY57,SLP65,BLNK-S,SLP-65,BLNK

**MIM** 604515

**UniProt ID** Q8WV28
