

## Recombinant Human CREBBP Protein, GST-tagged

Cat. No. CREBBP-19H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                               |
|------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Human CREBBP(amino acids 1031 to 1170) fused with GST tag at N-terminal was expressed in E. coli.                 |
| Species          | Human                                                                                                                         |
| Source           | E.coli                                                                                                                        |
| Form             | 20 mM Tris-HCl pH 8.0, 200 mM NaCl, 1 mM DTT, 20% glycerol.                                                                   |
| Molecular Mass   | 46 kDa                                                                                                                        |
| Purity           | >90% (SDS-PAGE)                                                                                                               |
| Applications     | Recombinant P300 Bromodomain is useful for protein binding and screening experiments examining acetylated protein substrates. |
| Storage          | Stable for six months at -80°C from date of receipt. For best results, aliquot and avoid multiple freeze/thaws.               |
| Concentration    | 1 mg/ml                                                                                                                       |

### GENE INFORMATION

|           |                                              |
|-----------|----------------------------------------------|
| Gene Name | CREBBP CREB binding protein [ Homo sapiens ] |
|-----------|----------------------------------------------|
