

Recombinant Adenovirus Type 40 Hexon Protein

Cat. No. ADE-007 **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Adenovirus type 40 hexon protein is a major component of the adenovirus capsid. The individual hexon protein is a complex molecule of approximately 100kD, which is comprised of a pedestal region and three loops that project away from the surface of the virion. Hexon proteins readily form trimers, and can then further self-assemble into capsomeres of 240 hexons. Hexon antigen is generated from functional Ad40 particles produced in tissue culture. The propagation methodology and harvest conditions are optimised for hexon isolation. Hexon is then further purified by dialysis and ion exchange chromatography to yield a product of high purity and low lot-to-lot variation.

Background

Human Adenoviruses (HAdV) are non-enveloped, non-segmented double stranded DNA viruses, which belong to the genus Mastadenovirus within the Adenoviridae family of viruses. Human adenoviruses commonly cause respiratory disease but some HAdV serotypes cause gastrointestinal disease, conjunctivitis and cystitis. The clinical disease caused by HAdV infection varies depending on the HAdV type. In immunocompromised patients, HAdV infection can cause severe clinical symptoms that may lead to respiratory failure, neurological disease and death (CDC). For handling dilute solutions of this product we recommend the use of albumin to help stabilise the protein and prevent undue loss on surfaces. Hexon protein naturally self assembles.

Purity

>95% pure by SDS-PAGE

Formulation

10mM Bis Tris Propane pH7.2, 375mM NaCl, 0.09% Sodium Azide

 Tel: 1-631-559-9269 1-516-512-3133

 45-1 Ramsey Road, Shirley, NY 11967, USA

Storage	Short Term Storage: Ambient Long Term Storage: Aliquot and freeze at less than -20 centigrade, freezer recommended at -80 centigrade. Avoid multiple freeze/thawing and long-term storage at 4 centigrade.
Concentration	Adjusted to 0.291 mg/mL by BCA Assay, using BSA standards in 10mM Bis Tris Propane pH7.2
Notes	This product is intended for research and manufacturing uses only. It is not a diagnostic device. The user assumes all responsibility for care, custody and control of the material, including its disposal, in accordance with all regulations.
Type	Recombinant
ClassID 1	Infectious Disease
GENE INFORMATION	
Synonyms	Adenovirus Type 40 Hexon
