

## p53 N-term CoIP Agarose kit

**Cat. No.** p53 N-term-02A    **Lot. No.** (See product label)

### SPECIFICATION

|                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| <b>Product Overview</b>   | <p>The p53-N-term-Trap Agarose Kit contains p53-N-term-Trap Agarose, lysis, wash, and elution buffers for efficient Immunoprecipitation of p53.</p> <ul style="list-style-type: none"> <li>• Pull down of human p53 isoforms alpha, beta and gamma with p53-Trap-N-term</li> <li>• Immunoprecipitation of the human p53 proteome with complementary p53-C-term- and p53-N-term-Traps, e.g. p53 isoforms and variants</li> <li>• No heavy &amp; light antibody chains in your downstream application</li> <li>• Short incubation time (60 min at +4 °C)</li> </ul> |
| <b>Specificity/Target</b> | p53 (isoforms: alpha, beta, and gamma); epitope 1-81 aa                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Tested Reactivity</b>  | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Conjugate</b>          | Agarose beads; bead size: ~ 90 µm (cross-linked 4 % agarose beads)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Elution buffer</b>     | SDS sample buffer<br>0.2 M glycine pH 2.5                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Type</b>               | Nanobody                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Storage Buffer</b>     | 20% ethanol                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
