

## Uric acid standard

**Cat. No.** Uric acid-10    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                         |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Uric acid standard                                                                                                                                                                      |
| <b>Description</b>      | Uric acid is the ultimate catabolite of purine metabolism in humans and higher primates. It is a weak organic acid that under physiologic conditions exists mainly as a monosodium salt |
| <b>Tag</b>              | Non                                                                                                                                                                                     |
| <b>Application</b>      | The preparation can be used in kits for determination of uric acid and also in reactions of organic synthesis.                                                                          |
| <b>Concentration</b>    | 20 mg/dl                                                                                                                                                                                |
