

## Native Annexin Protein, Gold conjugated

**Cat. No.** Annexin-013    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Annexin-gold conjugate (15 nm) may be used for apoptosis detection, process where translocation of phosphatidylserine from inner part of membrane to outer takes place. This translocation may be detected by binding with annexin-V gold conjugate. The preparation is supplied as solution of red color with adsorption at 520 nm about 2-3. |
