

Colloidal silver, anisotropic

Cat. No. Colloidal silver-023 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Colloidal silver, anisotropic
-------------------------	-------------------------------

Description	These nanoparticles have unique optical properties. They have two bands of plasmon resonance. One of them is about 400 nm but other is tunable and can be in range from 580-680 nm. This band is sensitive to any border effect and such nanoparticles can be very useful in various biosensors.
