

Recombinant Human periostin, osteoblast specific factor Protein, His&Flag tagged

Cat. No. POSTN-109H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human Periostin/OSF-2 protein (Q15063) (Asn 22-Ala 631) with both His, Flag tag at the C-terminus was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	22-631aa
Description	This gene encodes a secreted extracellular matrix protein that functions in tissue development and regeneration, including wound healing, and ventricular remodeling following myocardial infarction. The encoded protein binds to integrins to support adhesion and migration of epithelial cells. This protein plays a role in cancer stem cell maintenance and metastasis. Mice lacking this gene exhibit cardiac valve disease, and skeletal and dental defects. Alternative splicing results in multiple transcript variants encoding different isoforms. Induces cell attachment and spreading and plays a role in cell adhesion. Enhances incorporation of BMP1 in the fibronectin matrix of connective tissues, and subsequent proteolytic activation of lysyl oxidase LOX.
Tag	C-His&Flag
Molecular Mass	70.1 kDa
