

Recombinant Mouse X-C motif chemokine ligand 1 Protein, Tag Free

Cat. No. Cxcl1-181M **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant mouse CXCL1 protein (P12850) (Asn 25-Lys 96) without tag was expressed in E. coli.
Species	Mouse
Source	E.coli
ProteinLength	25-96aa
Description	This antimicrobial gene encodes a member of the CXC subfamily of chemokines. The encoded protein is a secreted growth factor that signals through the G-protein coupled receptor, CXC receptor 2. This protein plays a role in inflammation and as a chemoattractant for neutrophils. Aberrant expression of this protein is associated with the growth and progression of certain tumors. A naturally occurring processed form of this protein has increased chemotactic activity. Alternate splicing results in coding and non-coding variants of this gene. A pseudogene of this gene is found on chromosome 4.
Tag	Non
Molecular Mass	8.2 kDa
Endotoxin	Less than 1.0 EU/μg by the LAL method.
