

Recombinant Human RAR related orphan receptor C protein, His tagged

Cat. No. RORC-01H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human RORC protein (268-506aa) with N-His tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	268-506aa
Description	The protein encoded by this gene is a DNA-binding transcription factor and is a member of the NR1 subfamily of nuclear hormone receptors. The specific functions of this protein are not known; however, studies of a similar gene in mice have shown that this gene may be essential for lymphoid organogenesis and may play an important regulatory role in thymopoiesis. In addition, studies in mice suggest that the protein encoded by this gene may inhibit the expression of Fas ligand and IL2. Two transcript variants encoding different isoforms have been found for this gene.
