

Recombinant Human sodium voltage-gated channel alpha subunit 5 Protein, His tagged

Cat. No. SCN5A-13H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Purified recombinant protein of Human sodium channel, voltage-gated, type V, alpha subunit (SCN5A), transcript variant 1, 450Ile-650Val, with N-terminal His tag, expressed in E.coli.
Species	Human
Source	E.coli
ProteinLength	450-650aa
Description	The protein encoded by this gene is an integral membrane protein and tetrodotoxin-resistant voltage-gated sodium channel subunit. This protein is found primarily in cardiac muscle and is responsible for the initial upstroke of the action potential in an electrocardiogram. Defects in this gene are a cause of long QT syndrome type 3 (LQT3), an autosomal dominant cardiac disease. Alternative splicing results in several transcript variants encoding different isoforms.
Tag	N-His
Molecular Mass	23.9 kDa
Purity	> 80% as determined by SDS-PAGE and Coomassie blue staining
Notes	For testing in cell culture applications, please filter before use. Note that you may
