

Trypsin Residue Test Kit

Cat. No. KITF-077 **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Trypsin, an important digestive enzyme, is widely used in the development and production of vaccines and viral vectors. As a key ingredient in adherent cell culture processes, Trypsin biologics are classified as medium-risk ingredients, so Trypsin residue testing is required for process stages involving digestion with Trypsin. This kit can be used for the quantitative detection of trypsin residues, and can detect natural or recombinant pig-derived trypsin with high sensitivity and wide linear range.

Storage

12 months at specified storage conditions.
