

Recombinant Human Thrombopoietin Reference Standard

Cat. No. TPO-05HRS **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species	Human
Source	CHO
Tag	Non
Form	White lyophilized powder
Stability	Accelerated degradation studies have indicated that this material is suitably stable, when stored at -20°C or below, for the assigned values to remain valid until the material is withdrawn or replaced. These studies have also shown that the material is suitably stable for shipment at ambient temperature without any effect on the assigned values. Once reconstituted, diluted or aliquoted, users should determine the stability of the material according to their own method of preparation, storage and use.
Usage	As a reference standard for biological activity of Thrombopoietin.
Storage	For economy of use, it is recommended that the solution be sub divided into several small aliquots and stored at -40°C or below. The preparation should not be subjected to repeated thawing/freezing. Unopened ampoules should be stored at -20°C .
contents	Each ampoule contains the residue after freeze-drying of 1.0 ml of a solution

 45-1 Ramsey Road, Shirley, NY 11967, USA

comprising:
TPO approximately 500 nanograms
9.0 mg Sodium Chloride
1.0 mg Trehalose
2.0 mg Human Serum Albumin
0.1 microlitre Tween 20

Shipping

Because of the inherent stability of lyophilized material, may ship these materials at ambient temperature.

UNITAGE

This preparation is provided as a Reference Reagent for TPO bioassay, with an assigned potency of 5,000 Units per ampoule.

USE OF MATERIAL

No attempt should be made to weigh out any portion of the freeze-dried material prior to reconstitution. Dissolve the total contents of the ampoule in 1.0 ml of sterile distilled water. This solution will contain TPO at a concentration of 5,000 Units/ml. Use carrier protein where extensive dilution is required.
