

Recombinant Human Erythropoietin Reference Standard

Cat. No. EPO-30HRS **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species	Human
Tag	Non
Form	Freeze dried powder
Stability	Reference Materials should be stored on receipt as indicated on the label. Once reconstituted, diluted or aliquoted, users should determine the stability of the material according to their own method of preparation, storage and use.
Storage	Unopened ampoules should be stored at -20°C.
contents	Each ampoule contains the residue after freeze-drying of 0.5 ml of a solution that contained: Recombinant human EPO approximately 11µg Human serum albumin 0.2 % (w/v) Trehalose 1.0 % (w/v) NaCl 0.12 % (w/v)
Shipping	Because of the inherent stability of lyophilized material, may ship these materials at ambient temperature.
UNITAGE	Each ampoule contains 1650 IU of EPO.

USE OF MATERIAL

No attempt should be made to weigh out any portion of the freeze-dried material prior to reconstitution. For practical purposes, each ampoule contains the same quantity of recombinant human EPO. The entire content of each ampoule should be completely dissolved in an accurately measured amount of buffer solution. The use of water to reconstitute ampoule contents is not recommended. The material has not been sterilized and the ampoules contain no bacteriostat.
