

Native Tyrophagus Longior Extract Reference Standard

Cat. No. Tyrophagus Longior Extract-33ARS **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species	Tyrophagus longior mite
Source	Tyrophagus longior mite
Tag	Non
Form	Freeze-dried powder
Stability	Accelerated degradation studies have shown freeze dried allergen extracts stored in unopened ampoules at -20°C to be extremely stable over a number of years. Reference Materials should be stored on receipt as indicated on the label.
Storage	Unopened ampoules should be stored at -20°C.
contents	The extract was thawed at room temperature, filtered through a sterile HA Millipore, stored overnight at 4°C and distributed in 1.0ml volumes at room temperature into approximately 400 ampoules.
Shipping	Because of the inherent stability of lyophilized material, may ship these materials at ambient temperature.
USE OF MATERIAL	No attempt should be made to weigh out any portion of the freeze-dried material prior to reconstitution.

The total contents of the ampoule should be reconstituted with 1.0ml distilled water and dissolved gently by swirling to avoid froth. No attempt should be made to weigh out any portion of the freeze dried material. The reconstituted reagent should be used as soon as possible after reconstitution. The standard can also be used in in vitro assays such as the radioallergosorbent test (RAST), RAST inhibition, quantitative immunoelectrophoresis (CIE & CRIE), SDS-PAGE and immunoblotting.
