

## Recombinant Hepatitis B Core Ag protein, APC labeled, Tag Free

**Cat. No.** APC-HBcAg-19    **Lot. No.** (See product label)

### SPECIFICATION

|                          |                                                                                                                 |
|--------------------------|-----------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b>  | Recombinant HbcAg was produced in Pichia Pastoris. The protein was labeled with APC in vitro.                   |
| <b>Species</b>           | HBV                                                                                                             |
| <b>Source</b>            | P.pastoris                                                                                                      |
| <b>Description</b>       | HBcAg is a protein encoded by the hepatitis B virus that forms the core of the virus and has various functions. |
| <b>Tag</b>               | Non                                                                                                             |
| <b>Conjugation/Label</b> | APC                                                                                                             |
| <b>Molecular Mass</b>    | > 25 kDa                                                                                                        |
| <b>Storage</b>           | Store at - 70 centigrade or below. Aliquot to avoid multiple freeze/thaw cycles.                                |
| <b>Storage Buffer</b>    | PBS buffer                                                                                                      |
| <b>Concentration</b>     | 1.0 mg/mL                                                                                                       |
| <b>Conjugation</b>       | APC                                                                                                             |
