

Recombinant Full Length Human cereblon Protein, GST tagged

Cat. No. CRBN-09HFL **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full-length human CRBN was expressed by baculovirus in Sf9 insect cells using an N-terminal GST tag.
Species	Human
Source	Sf9 Cells
ProteinLength	1-442 aa
Description	This gene encodes a protein related to the Lon protease protein family. In rodents and other mammals this gene product is found in the cytoplasm localized with a calcium channel membrane protein, and is thought to play a role in brain development. Mutations in this gene are associated with autosomal recessive nonsyndromic cognitive disability. Multiple transcript variants encoding different isoforms have been found for this gene.
