

## Recombinant Human CRABP2 protein, His-tagged

Cat. No. CRABP2-3456H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                                                                               |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Human CRABP2 protein(P29373)(153aa), fused with N-terminal His tag, was expressed in E. coli.                                                                     |
| Species          | Human                                                                                                                                                                         |
| Source           | E.coli                                                                                                                                                                        |
| Protein Length   | 153aa(including fusion tag)                                                                                                                                                   |
| Tag              | N-His                                                                                                                                                                         |
| Form             | 20mM Tris.Cl, 50mM NaCl, 50% Glycerol, pH9.0.                                                                                                                                 |
| Molecular Mass   | 17.6kDa(including fusion tag)                                                                                                                                                 |
| Storage          | Store at -80°C and avoid repeated freeze-thaw cycles.                                                                                                                         |
| Reconstitution   | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents. |

### GENE INFORMATION

|                 |                                                                  |
|-----------------|------------------------------------------------------------------|
| Gene Name       | CRABP2 cellular retinoic acid binding protein 2 [ Homo sapiens ] |
| Official Symbol | CRABP2                                                           |
