

## Recombinant Human NKIRAS1 protein, His-tagged

**Cat. No.** NKIRAS1-4056H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                               |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human NKIRAS1protein(Q9NYS0)(207aa), fused with N-terminal His tag, was expressed in E. coli.                                                                     |
| <b>Species</b>          | Human                                                                                                                                                                         |
| <b>Source</b>           | E.coli                                                                                                                                                                        |
| <b>ProteinLength</b>    | 207aa(including fusion tag)                                                                                                                                                   |
| <b>Tag</b>              | N-His                                                                                                                                                                         |
| <b>Form</b>             | 20mM Tris.Cl, 100mM NaCl, 0.4M Urea, 50% Glycerol, pH8.0.                                                                                                                     |
| <b>Molecular Mass</b>   | 23.6kDa(including fusion tag)                                                                                                                                                 |
| <b>Storage</b>          | Store at -80°C and avoid repeated freeze-thaw cycles.                                                                                                                         |
| <b>Reconstitution</b>   | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents. |

### GENE INFORMATION

|                        |                                                                |
|------------------------|----------------------------------------------------------------|
| <b>Gene Name</b>       | NKIRAS1 NFKB inhibitor interacting Ras-like 1 [ Homo sapiens ] |
| <b>Official Symbol</b> | NKIRAS1                                                        |
