

Recombinant Human PARP1 Protein, His tagged

Cat. No. PARP1-001H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human PARP1 protein (71-328 aa) with His tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	71-328 aa
Description	This gene encodes a chromatin-associated enzyme, poly(ADP-ribosyl)transferase, which modifies various nuclear proteins by poly(ADP-ribosyl)ation. The modification is dependent on DNA and is involved in the regulation of various important cellular processes such as differentiation, proliferation, and tumor transformation and also in the regulation of the molecular events involved in the recovery of cell from DNA damage. In addition, this enzyme may be the site of mutation in Fanconi anemia, and may participate in the pathophysiology of type I diabetes.
Molecular Mass	30 kDa
