

Native Carica papaya latex Papain

Cat. No. Papain-12 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Native Carica papaya latex Papain
Species	Carica papaya
Stability	Stable for ~ 6months at 2-8 centigrade. Do not freeze aqueous suspensions.
Applications	Cell isolation where it is more gentle than other proteases (i.e.: cortical neurons, retina, and smooth muscle) Protein structural studies, peptide mapping Red cell surface modification for antibody screening or identification Fab preparation from IgG and IgM antibodies Solubilization of integral membrane proteins Production of glycopeptides from purified proteoglycans Enzymatic wound debridement
Notes	Papain preparations should be incubated in the activation solution before use to ensure full activity. Applications include antibody fragmentation and primary/neural cell isolation.
