

Recombinant Human WASL Protein, His tagged

Cat. No. WASL-001H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human WASL Protein (21-270 aa) with His tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	21-270 aa
Description	This gene encodes a member of the Wiskott-Aldrich syndrome (WAS) protein family. Wiskott-Aldrich syndrome proteins share similar domain structure, and associate with a variety of signaling molecules to alter the actin cytoskeleton. The encoded protein is highly expressed in neural tissues, and interacts with several proteins involved in cytoskeletal organization, including cell division control protein 42 (CDC42) and the actin-related protein-2/3 (ARP2/3) complex. The encoded protein may be involved in the formation of long actin microspikes, and in neurite extension.
