

Recombinant Human STING R232 variant, Y241A mutant, His tagged

Cat. No. STING-04H Lot. No. (See product label)

SPECIFICATION

Product Overview	Active recombinant human N-terminal His-tagged STING R232 variant (N242A mutant) expressed in E. coli
Species	Human
Source	E.coli
ProteinLength	138-379 aa
Description	This gene encodes a five transmembrane protein that functions as a major regulator of the innate immune response to viral and bacterial infections. The encoded protein is a pattern recognition receptor that detects cytosolic nucleic acids and transmits signals that activate type I interferon responses. The encoded protein has also been shown to play a role in apoptotic signaling by associating with type II major histocompatibility complex. Mutations in this gene are the cause of infantile-onset STING-associated vasculopathy. Alternate splicing results in multiple transcript variants.
Form	50 mM HEPES, pH 8.0, with 100 mM sodium chloride, and 10% glycerol
Molecular Mass	28.7 kDa
Purity	≥80% estimated by SDS-PAGE
