

## Recombinant Human PHC1 protein, GST-tagged

**Cat. No.** PHC1-7855H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                              |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human PHC1 protein(99-447 aa), fused with N-terminal GST tag, was expressed in E.coli.                                                                                                                                                                                                                                                                                           |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>ProteinLength</b>    | 99-447 aa                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Form</b>             | The purified protein was lyophilized from sterile phosphate-buffered saline (PBS: 58 mM Na <sub>2</sub> HPO <sub>4</sub> , 17 mM NaH <sub>2</sub> PO <sub>4</sub> , 68 mM NaCl, pH 8.0). Prior to lyophilization, 5% (w/v) trehalose and 5% (w/v) mannitol were incorporated as cryoprotective excipients. The protein was eluted with a buffer containing 100 mM reduced glutathione (GSH). |

**Storage** Store at 2-8°C for 1-2 weeks. Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.

**Reconstitution** Dissolve the product in 200 µl sterile water to achieve a working concentration of 0.25 g/µl. If experimental compatibility allows, mix the aqueous solution with an equal volume of glycerol (1:1 ratio) after initial reconstitution.

## GENE INFORMATION

**Gene Name** [PHC1 polyhomeotic homolog 1 \(Drosophila\) \[ Homo sapiens \]](#)

**Official Symbol** [PHC1](#)

**Synonyms** PHC1; polyhomeotic homolog 1 (Drosophila); early development regulator 1 (homolog of polyhomeotic 1) , EDR1, polyhomeotic like 1 (Drosophila); polyhomeotic-like protein 1; HPH1; RAE28; polyhomeotic-like 1; early development regulatory protein 1; early development regulator 1 (homolog of polyhomeotic 1); EDR1;

**Gene ID** [1911](#)

**mRNA Refseq** [NM\\_004426](#)

**Protein Refseq** [NP\\_004417](#)

**MIM** [602978](#)

**UniProt ID** [P78364](#)
