

## Recombinant Human DCAF8 protein, GST-tagged

**Cat. No.** DCAF8-5633H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                              |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human DCAF8 protein(311-594 aa), fused with N-terminal GST tag, was expressed in E.coli.                                                                                                                                                                                                                                                                                         |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>ProteinLength</b>    | 311-594 aa                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Form</b>             | The purified protein was lyophilized from sterile phosphate-buffered saline (PBS: 58 mM Na <sub>2</sub> HPO <sub>4</sub> , 17 mM NaH <sub>2</sub> PO <sub>4</sub> , 68 mM NaCl, pH 8.0). Prior to lyophilization, 5% (w/v) trehalose and 5% (w/v) mannitol were incorporated as cryoprotective excipients. The protein was eluted with a buffer containing 100 mM reduced glutathione (GSH). |

reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.

#### Reconstitution

Dissolve the product in 200 µl sterile water to achieve a working concentration of 0.25 g/µl. If experimental compatibility allows, mix the aqueous solution with an equal volume of glycerol (1:1 ratio) after initial reconstitution.

### GENE INFORMATION

**Gene Name** DCAF8 DDB1 and CUL4 associated factor 8 [ Homo sapiens ]

**Official Symbol** DCAF8

**Synonyms** DCAF8; DDB1 and CUL4 associated factor 8; WD repeat domain 42A , WDR42A; DDB1- and CUL4-associated factor 8; FLJ35857; H326; WD repeat domain 42A; WD repeat-containing protein 42A; WDR42A; MGC99640; MGC117276; MGC118891; DKFZp781G1096;

**Gene ID** 50717

**mRNA Refseq** NM\_015726

**Protein Refseq** NP\_056541

**UniProt ID** Q5TAQ9
