| <b>Product Overview</b>   | Pseudomonas Aeruginosa Antigen                                                                                                                       |
| <b>Species</b>            | Pseudomonas aeruginosa                                                                                                                               |
| <b>Source</b>             | Pseudomonas aeruginosa                                                                                                                               |
| <b>Description</b>        | Pseudomonas aeruginosa is a common encapsulated, Gram-negative, rod-shaped bacterium that can cause disease in plants and animals, including humans. |
| <b>Culture Conditions</b> | 37 centigrade, LB Medium, 18-24h                                                                                                                     |
| <b>Application</b>        | Positive Control                                                                                                                                     |
| <b>Storage</b>            | Store for less than 1 week at 2-8 centigrade. For long term storage, aliquot and store at -20 centigrade. Avoid multiple freeze/thaw cycles.         |
| <b>Storage Buffer</b>     | 0.1M PBS, PH 7.4                                                                                                                                     |
