

Recombinant Streptococcus Pyogenes IdeS Protein, His&GST tagged

Cat. No. IdeS-50S **Lot. No.** (See product label)

SPECIFICATION

Product Overview	The Streptococcus Pyogenes IdeS Protein, His Tag, GST Tag(KMP4413) is produced in E. coli. A DNA sequence encoding the streptococcus pyogenes IdeS (F8V4V0-1) (Asp30-Asn341) was expressed with the N-terminal polyhistidine-tagged a GST tag at the N-terminus (his-GST)
Species	Streptococcus Pyogenes
Source	E. coli
Description	IdeS (IgG-degrading enzyme of Streptococcus pyogenes) is a secreted cysteine endopeptidase from the human pathogen S. pyogenes with an extraordinarily high degree of substrate specificity, catalyzing a single proteolytic cleavage at the lower hinge of human IgG. This proteolytic degradation promotes inhibition of opsonophagocytosis and interferes with the killing of group A Streptococcus.
Molecular Mass	63.1 kDa
Purification	Affinity purification
Endotoxin	<1.0 EU/μg determined by the LAL method
Purity	> 85% determined by SDS-PAGE
Storage	Aliquot and store at -20 centigrade to -80 centigrade. Avoid repeated freezing and

thawing cycles.

Storage Buffer

PBS, 50% Glycerol, pH7.4

Shipping

In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature. If supplied as liquid, the proteins will be shipped with dry ice.
