

Recombinant Full Length Human EEF1A1 Protein

Cat. No. EEF1A1-15HFL **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human EEF1A1 Protein without tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	1-462aa
Description	This gene encodes an isoform of the alpha subunit of the elongation factor-1 complex, which is responsible for the enzymatic delivery of aminoacyl tRNAs to the ribosome. This isoform (alpha 1) is expressed in brain, placenta, lung, liver, kidney, and pancreas, and the other isoform (alpha 2) is expressed in brain, heart and skeletal muscle. This isoform is identified as an autoantigen in 66% of patients with Feltz syndrome. This gene has been found to have multiple copies on many chromosomes, some of which, if not all, represent different pseudogenes.
