

Recombinant Human TFPI2 Protein, His tagged

Cat. No. TFPI2C-65H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human TFPI2 (23-213 aa), fused to His-tag at C-terminus, was expressed in insect cell and purified by using conventional chromatography techniques.
Species	Human
Source	Insect Cells
ProteinLength	23-213 aa
Description	This gene encodes a member of the Kunitz-type serine proteinase inhibitor family. The protein can inhibit a variety of serine proteases including factor VIIa/tissue factor, factor Xa, plasmin, trypsin, chymotrypsin and plasma kallikrein. This gene has been identified as a tumor suppressor gene in several types of cancer. Alternative splicing results in multiple transcript variants.
