

## Human Liver Microsomes

**Cat. No.** Liver Microsomes-09H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                         |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Individual female human liver microsomes, genotyped for CYP2C19, High activity                                                          |
| <b>Species</b>          | Human                                                                                                                                   |
| <b>Source</b>           | Liver                                                                                                                                   |
| <b>Activity</b>         | High activity                                                                                                                           |
| <b>Gender</b>           | Female                                                                                                                                  |
| <b>Applications</b>     | A major tool for studying metabolite ID, reaction phenotyping, intrinsic clearance and inhibition studies.                              |
| <b>Caution</b>          | This sample should be considered as a potential biohazard and universal precautions should be followed. Intended for in vitro use only. |
| <b>Storage</b>          | At -80 centigrade.                                                                                                                      |
| <b>Concentration</b>    | 20 mg/mL                                                                                                                                |
