

## Mouse Liver Microsomes

**Cat. No.** Liver Microsomes-66M    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                    |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Pooled Female CD1 mouse liver microsomes                                                                                                                                           |
| <b>Species</b>          | Mouse                                                                                                                                                                              |
| <b>Source</b>           | Liver                                                                                                                                                                              |
| <b>Gender</b>           | Female                                                                                                                                                                             |
| <b>Applications</b>     | Animal microsomes are a major tool for studying metabolite ID, reaction phenotyping, intrinsic clearance and inhibition studies. Mouse microsomes are used for metabolism studies. |
| <b>Caution</b>          | This sample should be considered as a potential biohazard and universal precautions should be followed. Intended for in vitro use only.                                            |
| <b>Storage</b>          | At -80 centigrade.                                                                                                                                                                 |
| <b>Concentration</b>    | 20 mg/mL                                                                                                                                                                           |
