

## Mouse Liver S9

**Cat. No.** Liver S9-121M    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Pooled Female CD1 mouse liver S9 fraction. Mouse S9 have been produced from a bank of different CD-1, C57BL/6, BALB/c and B6C3F1 mouse tissue including liver, kidney, lung and intestine. For other tissue types inquire with customer service about our custom preparations. |
| <b>Species</b>          | Mouse                                                                                                                                                                                                                                                                          |
| <b>Source</b>           | Liver                                                                                                                                                                                                                                                                          |
| <b>Gender</b>           | Female                                                                                                                                                                                                                                                                         |
| <b>Applications</b>     | Mouse S9 fractions contain a mixture of cytosolic and microsomal enzymes, which express a wide variety of phase I and phase II enzymes.                                                                                                                                        |
| <b>Caution</b>          | This sample should be considered as a potential biohazard and universal precautions should be followed. Intended for in vitro use only.                                                                                                                                        |
| <b>Storage</b>          | At -80 centigrade.                                                                                                                                                                                                                                                             |
| <b>Concentration</b>    | 20 mg/mL                                                                                                                                                                                                                                                                       |
