

Recombinant Human CD99 Protein

Cat. No. CDA075P **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human full length CD99 expressed in E.coli,56kDa.
Species	Human
Source	E.coli
Description	CD99, or MIC2 gene product, or E2 antigen is expressed on the cell membrane of some lymphocytes, cortical thymocytes, and granulosa cells of the ovary. The antigen is also expressed by most pancreatic islet cells, Sertoli cells of the testis, and some endothelial cells. Mature granulocytes express very little or no CD99. MIC2 is strongly expressed on Ewing's sarcoma cells and primitive peripheral neuroectodermal tumors.
Presentation	10g/100μpurified human CD99 at 0.1mg/ml in 50mM Tris-Acetate, pH7.5, 1mM EDTA and 20% Glycerol without BSA and Sodium Azide.
Applications	•ELISA•Inhibition Assays •Western Blotting
Characterization	SDS-PAGE commassie blue stained gel, the purified recombinant protein shows a band at 56kDa.
Activity	Not known.
Storage	Store vial at -20°Cto -80°C. When stored at the recommended temperature, this protein is stable for 12 months.
