

Human CSPG4 Knockdown Cell Lysate

Cat. No. CSPG4-126HKCL **Lot. No.** (See product label)

SPECIFICATION

Product Overview	WB-validated CSPG4 Knockdown HeLa Cell Lysate
Species	Human
Source	HeLa
Description	A human melanoma-associated chondroitin sulfate proteoglycan plays a role in stabilizing cell-substratum interactions during early events of melanoma cell spreading on endothelial basement membranes. CSPG4 represents an integral membrane chondroitin sulfate proteoglycan expressed by human malignant melanoma cells.
Form	Cell-Tissue Lysis buffer
Molecular Mass	251 kDa
Notes	Instruction of use: This knockdown cell lysate should be paired with wild-type HeLa cell lysate for use. For Western blotting, we recommend running wild-type and knockdown lysates on the same gel, and loading each well with equal volume and equal amount of total proteins.
Storage	Store at -20 centigrade for two years.
Concentration	Lot-specific
