

Recombinant Human MDM2 Protein, His tagged

Cat. No. MDM2-2732H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human MDM2 Protein with His tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	This gene encodes a nuclear-localized E3 ubiquitin ligase. The encoded protein can promote tumor formation by targeting tumor suppressor proteins, such as p53, for proteasomal degradation. This gene is itself transcriptionally-regulated by p53. Overexpression or amplification of this locus is detected in a variety of different cancers. There is a pseudogene for this gene on chromosome 2. Alternative splicing results in a multitude of transcript variants, many of which may be expressed only in tumor cells.
