

Recombinant Human Micro molecule Collagen

Cat. No. Collagen-013H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Micro-molecule Collagen was purified.
Species	Human
Description	Collagen is the main structural protein in the extracellular matrix found in the body's various connective tissues. As the main component of connective tissue, it is the most abundant protein in mammals, making up from 25% to 35% of the whole-body protein content. collagen is widely used in cosmetic preparations. The role of collagen is to increase skin hydration and prevent skin ageing. Film-forming properties of collagen materials can be modified by collagen cross-linking and/or blending of collagen with other proteins and polysaccharides.
Form	Soluble Collagen, White or off white powder
Molecular Mass	500-5000 Da
Purity	≥90.0%
Storage	At -15 centigrade and below, protected from light,sealed.
pH	6.0-8.0
Collagen content	≥90.0%
Recommended	0.01%~0.05%
