

Recombinant Full Length Human C1S Protein, His tagged

Cat. No. C1S-30HFL **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant protein of human complement component 1, s subcomponent (C1S), transcript variant 2 with Flag tag was expressed in HEK293T.
Species	Human
Source	HEK293T
ProteinLength	1-688 aa
Description	This gene encodes a serine protease, which is a major constituent of the human complement subcomponent C1. C1s associates with two other complement components C1r and C1q in order to yield the first component of the serum complement system. Defects in this gene are the cause of selective C1s deficiency.
