

## Active Recombinant Yeast Alcohol dehydrogenases

**Cat. No.** ADH-01Y    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                          |
|-------------------------|----------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Active Recombinant Yeast Alcohol dehydrogenases was expressed in E. coli.                                |
| <b>Species</b>          | Yeast                                                                                                    |
| <b>Source</b>           | E.coli                                                                                                   |
| <b>Description</b>      | Alcohol dehydrogenase. Oxidizes primary as well as secondary alcohols. Ethanol is a very poor substrate. |
| <b>Form</b>             | White lyophilized powder                                                                                 |
| <b>Bio-activity</b>     | 3333 U/mg solid                                                                                          |
| <b>Purity</b>           | ≥95% by SDS-PAGE                                                                                         |
| <b>Storage</b>          | Store at -20 centigrade for at least 2 years                                                             |

### GENE INFORMATION

|                        |                             |
|------------------------|-----------------------------|
| <b>Official Symbol</b> | ADH                         |
| <b>Synonyms</b>        | ADH; Alcohol dehydrogenases |
