

Recombinant Human NECTIN4 Protein, His&T7 tagged, Biotinylated

Cat. No. NECTIN4-8049HB **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Biotinylated recombinant Human NECTIN4 Protein (31-317 aa) with His&T7 tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	31-317 aa
Conjugation/Label	Biotin
Description	This gene encodes a member of the nectin family. The encoded protein contains two immunoglobulin-like (Ig-like) C2-type domains and one Ig-like V-type domain. It is involved in cell adhesion through trans-homophilic and -heterophilic interactions. It is a single-pass type I membrane protein. The soluble form is produced by proteolytic cleavage at the cell surface by the metalloproteinase ADAM17/TACE. The secreted form is found in both breast tumor cell lines and breast tumor patients. Mutations in this gene are the cause of ectodermal dysplasia-syndactyly syndrome type 1, an autosomal recessive disorder. Alternatively spliced transcript variants have been found but the full-length nature of the variant has not been determined.
