

Benzoylated Naphthoylated DEAE-Cellulose

Cat. No. Benzoylated Naphthoylated DEAE-001C **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Benzoylated Naphthoylated DEAE-Cellulose is a cellulose ion-exchange adsorbent used in ion exchange chromatography.

Applications

Benzoylated Naphthoylated DEAE-Cellulose is a cellulose medium used for protein chromatography, ion-exchange chromatography and anion-exchange media. Phenylacetylnaphthoyl DEAE is particularly suitable for the separation of single-stranded and double-stranded DNA. A more effective method for detecting human papillomavirus DNA was designed using phenylacetylnaphthoyl DEAE, and the cytotoxicity of the drug 5-fluorouracil (FUra) was studied.
