

Recombinant Human Sex Hormone binding globulin Protein, His tagged

Cat. No. SHBG-15H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human sex hormone-binding globulin (SHBG) expressed in HEK293 cells with His-tag.
Species	Human
Source	HEK293
ProteinLength	1-402 aa
Description	Native sex hormone-binding globulin (SHBG) is a homodimeric glycoprotein of approximately 90 kDa, with each monomer comprising 373 amino acids, two intramolecular disulfide bonds, and glycosylation sites including two biantennary N-linked and one O-linked oligosaccharide. Its serum concentration is influenced not only by androgens and estrogens but also by thyroid hormones and various metabolic factors. Abnormal SHBG levels are associated with a range of conditions, including hyper- and hypoandrogenism, thyroid and pituitary disorders, liver disease, and hormone-related cancers such as breast and prostate cancer.
Form	Liquid in DPBS.
Molecular Mass	Expected Molecular Weight: 48.23 kDa Observed Molecular Weight: 50.0 kDa
Storage	Short Term Storage: -80 centigrade Long Term Storage: -80 centigrade Avoid multiple freeze-thaw cycles, Can be frozen, but avoid multiple freeze-thaw cycles.
