

Recombinant Nipah virus Nucleoprotein, His tagged

Cat. No. N-24N **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Nipah virus Nucleoprotein (NCBI accession number NP_112021.1, AA 1-532), expressed in HEK293 cells. The protein contains a C-terminal glycine-serine linker, a TEV protease site and a His-tag. The protein was purified from cell pellets by sucrose density centrifugation, and resulting dense complexes were then dissolved in the buffer described below containing 4M urea.
