

Active Recombinant Cynomolgus APOE Protein, His Tagged

Cat. No. APOE-11232C Lot. No. (See product label)

SPECIFICATION

Product Overview	Cynomolgus Apolipoprotein E Protein, His Tag is expressed from human 293 cells (HEK293). It contains AA Lys 19-His 317 (Accession # P10517). This protein carries a polyhistidine tag at the C-terminus. Predicted N-terminus: Lys 19
Species	Cynomolgus
Source	HEK293
ProteinLength	19-317 aa
Description	APOE is an apolipoprotein, a protein associating with lipid particles, that mainly functions in lipoprotein-mediated lipid transport between organs via the plasma and interstitial fluids. APOE is a core component of plasma lipoproteins and is involved in their production, conversion and clearance. Apolipoproteins are amphipathic molecules that interact both with lipids of the lipoprotein particle core and the aqueous environment of the plasma. As such, APOE associates with chylomicrons, chylomicron remnants, very low density lipoproteins (VLDL) and intermediate density lipoproteins (IDL) but shows a preferential binding to high-density lipoproteins (HDL). It also binds a wide range of cellular receptors including the LDL receptor/LDLR, the LDL receptor-related proteins LRP1, LRP2 and LRP8 and the very low-density lipoprotein receptor/VLDLR that mediate the cellular uptake of the APOE-containing lipoprotein particles.
Form	Lyophilized from 0.22 µm filtered solution in PBS, pH7.4 with trehalose as protectant.

Bio-activity	Cynomolgus TREM2, His Tag immobilized on CM5 Chip can bind Cynomolgus Apolipoprotein E Protein, His Tag with an affinity constant of 7.78 μ M as determined in a SPR assay.
Molecular Mass	The protein has a calculated MW of 35.9 kDa. The protein migrates as 35-40 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation.
Endotoxin	Less than 1.0 EU/ μ g by the LAL method/rFC method.
Purity	>90% as determined by SDS-PAGE.
Storage	This product is stable after storage at: -20 to -70 centigrade for 12 months in lyophilized state; -70 centigrade for 3 months under sterile conditions after reconstitution. For long term storage, the product should be stored at lyophilized state at -20 centigrade or lower. Please avoid repeated freeze-thaw cycles.
Reconstitution	It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 μ g/ μ L. Centrifuge the vial at 4 centigrade before opening to recover the entire contents.

GENE INFORMATION

Gene Name	APOE apolipoprotein E [<i>Macaca fascicularis</i> (crab-eating macaque)]
Official Symbol	APOE
Synonyms	APOE; apolipoprotein E; Apo-E; apolipoprotein E; proapolipoprotein E (AA -18 to 299)
Gene ID	102138471
mRNA Refseq	XM_074023874
